

HEALTH CARE *at HOME*

what is **HOME HEALTH?**

PERSON-CENTERED CARE

FOCUSING ON RECOVERY & THERAPY

ELIGIBILITY FOR HOME HEALTH

Initiated by your physician, we work closely together to develop a care plan specifically for you. Working together to reach your goals of recovery.

PATIENT CRITERIA FOR HOME HEALTH

- Confined to home or need assistance or medical equipment to leave home on a limited basis
- Currently under the care of a physician who will establish and periodically review the plan of care
- Need for skilled nursing care to achieve goals on an intermittent basis for recovery from recent illness or injury such as:
 - **Physical Therapy:** Gross motor skills, to improve strength, balance, and pain management
 - **Occupational Therapy:** Fine motor skills, to bridge gaps that improve activities of daily living
 - **Speech-language Pathology:** Assistance with cognitive, language, speech, and communication
 - **Skilled Nursing Cares:** Management for wounds, catheter, ostomy, ventilator

SUPPORTIVE SERVICES

- **Outpatient Therapy:** To assist in furthering goals for independence
- **Medical Social Worker:** Short term counseling, patient care coordination, assistance for medical equipment and medicine management

GOALS

Home Health is skilled [specially trained and licensed] medical care that is qualified for a short time, typically 60 days to recover or return to a previous state of health. Once a patient is no longer homebound or has met their goals, they no longer qualify for Home Health.

INSURANCE

Terrace Home Health is contracted with most private insurances and works directly with insurance companies.
